Undeelded as to Whether They See Their Moses in Dewey, Schley or Gen. Miles Hopelessly at Sea as to the Issue Nothing in Sight Now Except Schley.

D

WASHINGTON, Dec. 22 .- Ever since the elections of 1900, when William J. Bryan was for the second time defeated for the Presidency, the Democratic party in Congress has been looking for an issue for 1904. In addition to an issue, they want a leader. They are totally at sea with regard to the issue, but as to a leader they think they see him looming up out of the smoke surrounding the Schley-Sampson controversy, which officially came to such a dramatic ending yesterday. Whether this leader to come to the front as the Democratic Moses will be Admiral George Dewey, who thought he saw his opportunity and took advantage of it in signing the report of the Court of Inquiry that condemned Schley, or whether it will be Gen. Nelson A. Miles, the perennial candidate, who flung his gauntlet into the ring the day after Dewey did, and with such disastrous results to himself, or whether it will be Admiral Schley, who at present is the candidate only of Gen. Felix Agnus, the Baltimore Republican, and Senator Jim Jones of Arkansas, chairman of the Democratic National Committee, or whether it will be some man who shall rise out of the wreck of these three aspiring military heroes, is not yet entirely clear. The situation is one that depends altogether upon cir-

As regards an issue the Democrats are at present hopelessly at sea, the only thing in sight being Schley, and according to present indications that name will be anything but a talisman for political success. The Democrats in Congress are desperately seeking for some plank to float ashore on, and the Republican leaders are just as determined not to give them any material out of which to construct a life-saving raft. During the past ten days the Senate leaders have been in frequent consultation with Speaker Henderson and his lieutenants on the floor of the House for the purpose of having an agreement in a general way as to what matters of legislation shall be discussed and disposed of at the present which will end just before the opening of the Congress campaign of 1902. The importance of continuing the Republican control of the Lower House is not so great as it would be if the Democrats had a chance of carrying the Senate, but it is great enough to induce the leaders to put forth every effort to save it, and this they are determined to do.

No definite programme has resulted from the conference of the leaders of the two houses, but there is a general understanding that nothing but the necessary or most important legislation upon which there is general agreement shall be put to the front. Senator Allison has been | Territory be united to form one State, and authorized to appoint a steering committee for the Senate, and after the holiday recess they will confer from time to time with the House leaders with a view to harmonious joint action. One point of the programme has already been agreed upon. This is that economy shall be the watchword and the bills appropriating money out of the public treasury kept down to the smallest number and the lowest amounts pos-The River and Harbor bill will be sible. The River and Harbor bill will be small, and probably the gigantic scheme of drawing on the Treasury for a limitless amount of money for the irrigation of the arid lands of the West will be knocked in the head. It has already received a hard blow from the opposition that is being manifested in the agricultural States, manifested in the agricultural States, whose representatives are urging upon Congress the injustice of giving Government aid for the cultivation of one section of the country at the expense of all the other sections. The Nicaraguan Canal Construction bill will undoubtedly pass and perhaps a Ship Subsidy bill, as the measure introduced at this session is said to contain amendments which make it more or less acceptable to the Republicans in both houses who were not favorable to last year's bill. After all these measures are disposed of, it will be decided whether to frame and pass a bill for the reduction of the war revenue taxes; the only question being whether there will be any surplus left to dispose of. If there shall be a bothersome surplus, the tax reduction bill will be passed, if not, the internal revenue law The only chance the Democrats see in this programme is in the Ship Subsidy bill. They will endeavor to make this a rallying

handicapped in their effort by the fact that some of the best men in their own party, favor some kind of liberal legislation for the building up of the American merchant marine. The Democrats in the House thought they saw a faint hope of making an issue out of the temporary Philippines Tariff bill passed last week, but their attempt to rouse their party on an anti-imperialistic cry was such an abject failure that they will not be apt to try it again. The bill providing for a permanent tariff for the Philippines and carrying but the recommendations of the Philippines Commission will come up after the holidays, but it is not likely that the Democrate will be able to do any better toward making an issue to do any better toward making an issue out of it than they did last work. A Delegation Urges Union With Indian SAVED TO BUY CHRISTMAS GIFTS. WASHINGTON, Dec. 22 .- A strong effort is to be made at this session of Congress Saloonkeeper's Patrons Who Have Been

Consistent Economists for a Year. Several families on the upper East Side of town will have to thank Samuel Wenck who keeps a saloon in East Eighty-eighth street for a Merry Christmas this year. If it hadn't been for wenck about fifty of his patrons might not have been able to ouy Christmas presents this year.

The latter delegation argues that Indian Territory is too poor at present to bear the expenses of even a Territorial form of government, but that when the Indian lands are divided and the surplus sold and Wenck's saloon is known as the "Last Stop." It is the last saloon in the street, lands are divided and the surplus sold and settled up the Territory will have sufficient population to entitle it to Statehood and be able to support a State government. They say the people of Oklahoma want the Indian Territory incorporated into the proposed new State simply to help support the State government. One night about Christmas last year many of his patrons were bemoaning the fact that they were so short of funds that they would not be able to remember their relatives and friends as they would like to do. Wenck, inspired by an idea, suggested that another Chrismas need not find them

Charles Horan, formerly manager of minor pugilists and sometimes known as the champion pinochle player of the East Side. is mourning the death of a valuable Irish setter, presented to him by a brother-inlaw of "Big Jim" Kennedy, the sporting man who runs a hotel at Hot Springs, Ark. The dog died early yesterday of poison. Horan has offered \$500 reward for evidence which will enable him to capture and punish the poisoner.

Horan told his friends in the Equitable Hotel at the Bowery and Grand street that he is the only Irishman in his block in 108th street, near Third avenue. The other tenants are all German, and he lays the death of his dog at their door.
